

Manuel Ramp

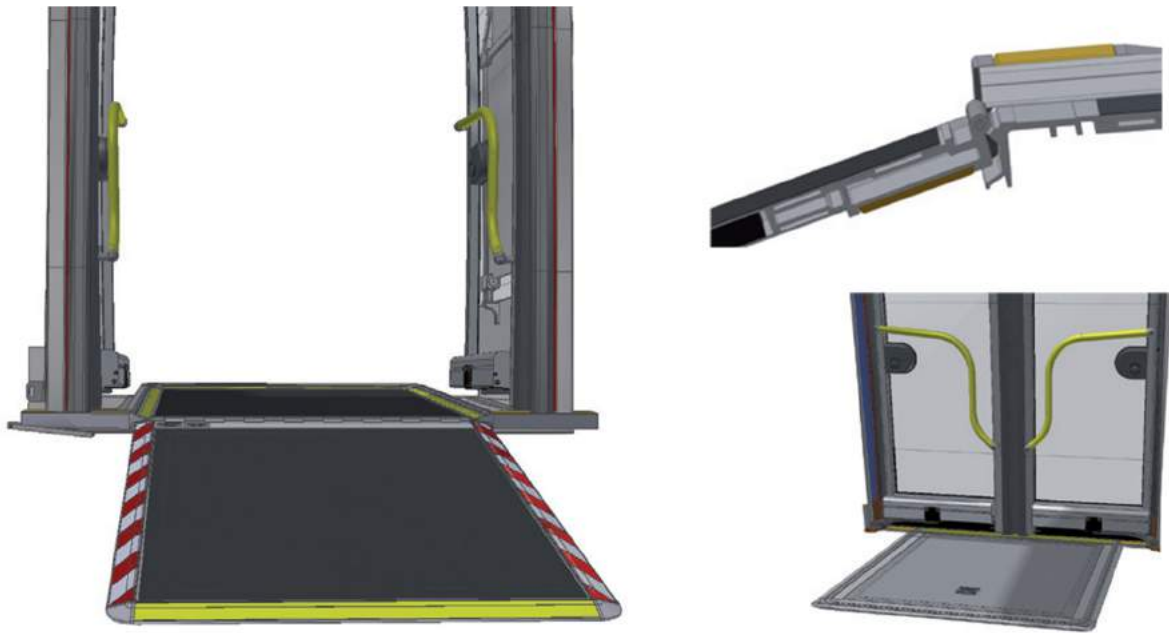

Safe and easy to handle

Ventura Systems C.V. ramp is a lightweight wheelchair ramp designed for safe access to public transportation. The composite aluminum makes it strong and easy to handle. The ramp is designed for low floor city busses.

The ramp has a hardwearing, anti-slip paint finish and raised edges along each side for enhanced safety. Our wheelchair access ramps are DPTAC compliant. The ramp comes in different sizes with different types of handgrips.

Ventura Systems C.V. has produced innovative door systems for urban public transport since 1994. Our innovative technologies and global presence have made Ventura Systems C.V. a marketleader in the industry. The modular design of our door systems allows them to be adapted to any requirement so we can offer custom engineered products. Ventura Systems C.V. is ISO 9001/2015 certified.

We welcome millions of people every day

Features

- Disabled Persons Transport Advisory Committee (DPTAC) compliant

Global Service Network

We send service agents on a regular basis to our clients. These will provide guidance in the installation of the doorsystems and ramps in the vehicle, solve possible errors and provide extra training when necessary.

All Ventura Systems C.V. door systems are designed according to EU regulation ECE R107.

We welcome millions of people every day
