

PRESS RELEASE

Ventura Systems ISO 14001 and IATF 16949 certified

Bolsward, 30 November 2021 - Ventura Systems CV, market leader in bus door systems, is proud to announce that it has achieved both ISO 14001 (environmental management) and IATF 16949 (automotive quality management system) certification.

One of Ventura Systems' main objectives is to be at the forefront of sustainability and quality. Costs and time haven't been spared to comply with these important environmental and quality management systems. All of Ventura's employees, and in particular the 9-person Total Quality Management team, have been working for quite some time to bring the entire process to a higher level and to make adjustments throughout the company.

What does ISO 14001 mean?

ISO 14001 is the internationally accepted standard with requirements for an environmental management system developed by the International Organization for Standardization. The environmental management system is used to develop an environmental policy appropriate to the organization and to ensure its implementation.

What is IATF 16949?

The IATF 16949 describes the requirements for the quality management system related to the design and development, production, and installation of automotive related products. The technical specification has been prepared by IATF participating organizations and has also been approved by ISO. Among others, BMW, Daimler Chrysler, Fiat, Ford, General Motors, Peugeot-Citroen, Renault, Volkswagen and the VDA are co-owners of the IATF 16949.

Enhancement of quality and environmental management.

With this double certification, Ventura Systems further distinguishes itself from the competition and the quality of products, processes and the environment were further increased. The ISO 14001 and IATF 16949 certifications further enhance Ventura's ability to consistently deliver products and services that meet their customers' requirements and comply with applicable laws and regulations. By effectively improving processes, partnering with Ventura Systems guarantees predictability and reliability. In addition, Ventura can increase customer satisfaction.
